PROFILE

Senior Frontend Engineer with 5+ years of production experience building complex React and TypeScript applications: data-dense, stateful dashboards, multi-tenant platforms and reusable component libraries consumed across several product teams. At Adsmurai I co-own the frontend of three products with one peer engineer: architecture, monorepo and shared-library structure, build tooling and quality standards. Track record of incremental, large-scale architecture and tooling migrations (webpack to Vite, monorepo consolidation) delivered without downtime. Experience with real-time data flows (WebSockets, polling, concurrency control) and strong focus on testing (Vitest, Cypress, React Testing Library), performance, developer experience and mentoring. Comfortable working horizontally with product, design and backend to align on architecture and unblock dependencies.

EXPERIENCE

Senior Frontend Engineer

Jun 2023 – Present · Barcelona, Spain

Adsmurai — marketing technology platform

- Co-own, together with one peer engineer, the frontend of three products in parallel: technical planning, task distribution and architecture decisions. Act as technical reference and point of contact for product, design and backend teams.
- Designed, built and maintain a data-transformation platform that generates optimized product feeds for digital marketing channels, handling large, complex and highly stateful configuration flows.
- Built multi-client dashboards with near-real-time metric visualization (ECharts), used daily by marketing teams to make decisions. Implemented a concurrency-limited request queue (sliding window of 20 in-flight requests) to keep data fresh without overloading the backend with thousands of simultaneous calls.
- Own a shared React component library published to npm and used as the foundation of multiple internal applications, aligning UI patterns across teams.
- Led large-scale, incremental architecture migrations without rewrites or production downtime: consolidated applications and shared libraries into a monorepo structure with typed internal packages, and migrated the build toolchain from webpack to Vite, cutting build times by more than 30%.
- Defined frontend architecture guidelines and code-review practices; drive testing standards with Vitest, React Testing Library, Cypress and Storybook.
- Integrated AI-assisted development and MCP tooling connected to Jira, Sentry and GitLab to automate workflows, improve traceability, strengthen CI/CD and production observability.
- Participate in hiring and mentor new frontend engineers through onboarding, pairing and code reviews.

Stack: TypeScript · React · Zustand · React Hook Form · Material UI · Sass · Axios · REST APIs · Monorepo · Vite · webpack · Vitest · Jest · React Testing Library · Cypress · Storybook · ECharts · react-i18next · Sentry · GitLab CI

Semi-Senior Frontend Developer & Mentor

Feb 2022 – May 2023 · Remote

Folcode — software consultancy and e-learning (Folcademy)

- Developed and maintained a multi-language (4 locales) e-learning platform: landing, store and dashboard, using React, Next.js and TypeScript.
- Implemented role-based authentication and authorization with Keycloak.
- Built reusable UI components for the BITCloud product.
- Co-designed the “Frontend Dev – React & Next.js” training program and taught the “UI Developer – HTML, CSS & JS” course; mentored frontend students (AngularJS) in the Folcamp program.

Stack: TypeScript · React · Next.js · React Intl · CSS Modules · Styled JSX · React Hook Form · Material UI · Axios · REST APIs · Keycloak

Frontend Developer

Aug 2021 – Dec 2021 · Remote

Splight — AI and machine-learning platform for the energy sector

- Built web applications on top of AI/ML systems using React and Next.js, including real-time data streams over WebSockets to display live sensor and model output.
- Implemented Auth0 authentication and authorization across several platforms.
- Created the project's own reusable component library (React + webpack), published to and consumed from npm.

Stack: TypeScript · React · Next.js · React Intl · CSS Modules · WebSockets · Auth0 · Material UI · Axios · Chart.js · Jest · Cypress

Frontend Developer

Jan 2021 – Aug 2021 · Remote

Bitlogic — software consultancy (client: G-SE, health and exercise-science education platform)

- Implemented blog and Q&A sections with user interaction and improved SEO positioning.
- Built server-side rendered features with Next.js and Auth0.
- Wrote unit and BDD tests.

Stack: React · Next.js · React Intl · Material UI · Auth0 · Axios · Jest · React Testing Library · Cypress

SKILLS

Frontend	React, TypeScript, JavaScript (ES2022+), Next.js, state management (Zustand), real-time data flows (WebSockets, polling, request batching and concurrency control; familiar with SSE), React Hook Form, React Intl / i18next, Material UI, Sass, CSS Modules, Storybook
Testing & quality	Vitest, Jest, React Testing Library, Cypress, BDD, code review, SOLID, clean architecture
Tooling & ops	Monorepo tooling, typed internal packages, Vite, webpack, npm package publishing, Git / GitLab CI, Docker, Sentry (error and performance monitoring), AI-assisted development, MCP integrations
Backend & data	REST APIs, Auth0, Keycloak, Node.js basics, PHP / Laravel, MySQL, SQL Server, MongoDB
Leadership	Shared technical ownership of 3 parallel products, mentoring, hiring, technical documentation, cross-team architecture alignment

EDUCATION

Universidad Tecnológica Nacional (UTN – FRC) — Associate Degree in Programming (Técnico Universitario en Programación) 2018 – 2020

Digital Mind — UX/UI Design course 2022 – 2023

Digital House — Full Stack Web Development bootcamp (PHP, Laravel, MySQL) 2019 – 2020

LANGUAGES

Spanish (native) · English (B1, professional working proficiency in technical contexts)
